Australian Dairy Industry Council draft Murray Darling Basin plan position

The draft Basin Plan has not effectively balanced environmental needs with those of the community and the economy.

1. SDL set to meet catchment environmental needs.
2. 2015 review to assess SDL in light of environmental works and measures, improved river operations and new knowledge in meeting downstream needs.
3. No further general buyback tenders in the southern system. Buyback limited to strategic purchases linked to community-led efficiency projects.
4. More funding to extend \$300 million On-Farm Irrigation Efficiency Program.
5. More funding for modernisation programs in the NSW Murray and Murrumbidgee, and rehabilitation of the Murray Swamps in SA.
6. Environmental objectives to be achieved using:
 - Environmental works for greater water efficiency and improved flows.
 - Improved river operations.
